

Thank you for sending the information about the VRS. I need more to get know how to talk with relay. One of them said about how to operation on VP-100 when I got it at first. I could't get all the information what I want to ask for. Just plain stuff, but that person did a good job. Not enough for me to know what to do on the rules like can use or can't use on VP-100. I want to know if I could get webcam because of my two friends has d-link and webcam. I will appreciate if you send me the more information about it. Thank you for your time and help. Gail
